

TYPO3.Flow - Feature # 49039

Status:	New	Priority:	Could have
Author:	Christopher Hlubek	Category:	Log
Created:	2013-06-11	Assigned To:	
Updated:	2013-07-10	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	RFC: Use PSR-3 logger interface in Flow		
Description			
Advantages:			
<ul style="list-style-type: none">- Interoperability of Flow loggers with 3rd party libraries- Usage of 3rd party loggers in Flow (e.g. monolog)			
Problems:			
<ul style="list-style-type: none">- Signature of Psr\Log\LoggerInterface->log is not compatible with TYPO3\Flow\Log\LoggerInterface			
Ideas:			
<ul style="list-style-type: none">- 1: Create an Adapter class that decorates a Flow LoggerInterface and implements a Psr LoggerInterface to the outside<ul style="list-style-type: none">- This will ease the usage of 3rd party libraries that depend on Psr\Log in Flow, could be implemented in a separate package- 2: Create an Adapter class that decorates a Psr LoggerInterface and implements a Flow LoggerInterface, deprecate the current Flow logger<ul style="list-style-type: none">- This is the path for a full transition to PSR-3 in Flow, could finally make something like a TYPO3.Flow.Log package an optional dependency of Flow
