<b>Complexity:</b>	easy		
<b>Subject:</b>	Allow Subqueries in QueryInterface		
<b>Description</b>			
<p>Currently, subqueries are supported by doctrine, but not by flow. Fixing this should be easy. This is how it should look like in the repository:</p> <pre>\$q = \$this-&gt;createQuery(); \$constraint = \$q-&gt;matching('in', \$otherQueryInterface);</pre> <p>To allow this, simple add <code>__toString()</code> to QueryInterface. Doctrine/Query can easily implement this with:</p> <pre>\$this-&gt;queryBuilder-&gt;__toString();</pre>
