

Core - Bug # 49123

Status:	Closed	Priority:	Must have
Author:	Paul A. Auwehla	Category:	rtehtmlarea
Created:	2013-06-14	Assigned To:	Stanislas Rolland
Updated:	2013-06-28	Due date:	
TYPO3 Version:	6.1		
PHP Version:			
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	RTE-Htmlarea is unable to edit when images are unknown		
Description			
<p>Oops, an error occurred!</p> <p>Folder typo3conf/ext/rtehtmlarea/htmlarea/plugins/TYPO3Browsers/img/external_link_new_window.gif does not exist.</p> <p>There are for ex. link-symbols in the text. These symbols where automatically inserted using a rtehtmlarea-version in the LOCAL typo3conf-directory. (see error message above).</p> <p>If you trying to edit this texts containing these no longer existing link-symbol-images then rtehtmlares gives the above error-message and you will fail to edit these texts with the new tyo3-version and the new rtehtmlarea.</p> <p>Other non-existing images in the text are no problem.</p>

The images are still there...

You get this error when trying to open the content element?

Oops! typo3conf/ext/.. this was created with a locally installed version of rtehtmlarea?

#2 - 2013-06-28 06:12 - Stanislas Rolland

- Assigned To set to Stanislas Rolland

- Target version set to next-patchlevel

This issue is fixed in git repository. See patch: <https://review.typo3.org/#/c/21041/>

Therefore it should be fixed in TYPO3 6.1.2

You will not recover the icon, but at least the content element will be editable.
