Sprint Focus:	

Subject:	Update Wizard "Install System Extensions" shown in opposite of need.

Description

If you do not have all system extensions active, which are recommended by the 'Install System Extensions' (like simulatestatic) the update wizard will be always present. On the other side, if not all recommended extensions are shown till yet, the update wizard isn't present.

Test 1:

- Deactivate "simulatestatic"
- Look at Update Wizard
- "Install System Extension" is always present, also if you perform the wizard with unselecting simulatestatic.
- The wizard is not present if you activate all recommended system extensions.

Test 2:
- Deactivate "simulatestatic"
- In File LocalConfiguration.php in section => 'INSTALL' => 'wizardDone' => 'TYPO3\CMS\Install\CoreUpdates\InstallSysExtsUpdate', remove an application (for example "recycler").
- "Install System Extension" isn't present, but should, as "recycler" wasn't shown as recommended extension till yet.

Revision 45bd6239 - 2013-06-30 17:38 - Helmut Hummel

[BUGFIX] Do not show System Extensions Wizard when done

The check if the wizard has been executed before and
includes all available system extensions have been installed
is wrong. Rather than casting to bool, we should
check if the difference between "seen extensions" and
available system extensions is an empty array.

This correctly shows the wizard when not finished and
hides it when finished.

Resolves: #49256
Releases: 6.2, 6.1, 6.0
