TYPO3.Fluid - Feature # 49305

Status:	Closed	**Priority:**	Should have
Author:	Marco Falkenberg	**Category:**	ViewHelpers
Created:	2013-06-21	**Assigned To:**	Bastian Waidelich
Updated:	2013-06-21	**Due date:**	
Has patch:	No		
Subject:	Support for Data Attributes in tag-based ViewHelpers		
Description			

Adding Data Attributes to tag-based ViewHelpers via "additionalAttributes" is an exhausting task, because of the escaping and nesting stuff and so on.

    <f:link action="doSomething" data-role-tooltip="{f:translate(id:'doSomething')}">Do something!</f:link>

vs.

    <f:link action="doSomething" additionlAttributes="{data-role-tooltip: '{f:translate(id:\'doSomething\')}'}">Do something!</f:link>
