Subject:	Call to undefined method TYPO3\CMS\Backend\Form\ElementConditionMatcher::setRecord()		

Description

In the change "[TASK] Extract displayCond functionality from FormEngine to new class" the
TYPO3\CMS\Backend\Form'FormEngine->isDisplayCondition() broke.

Resulting in:

Fatal error: Call to undefined method TYPO3\CMS\Backend\Form\ElementConditionMatcher::setRecord() in
typo3_src-6.1.0/typo3/sysext/backend/Classes/Form/FormEngine.php on line 5954

When adding a condition to the sheet section of a flexform like in forge.typo3.org/issues/33390#note-8

Why is this function deprecated when it's still used for rendering flexforms?

+1 ... BTW: the method is **not** used in the core, this is probably some extension that caused this for you, the fatal however needs to be fixed.
