

TYPO3.Flow - Bug # 49373

Status:	New	Priority:	Must have
Author:	Andreas Wolf	Category:	Security
Created:	2013-06-24	Assigned To:	
Updated:	2013-06-24	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	Methods policy with key "Controllers" is ignored		
Description			
<p>I'm using the following Policy.yaml file:</p> <pre>1 roles: 2 Administrator: [User] 3 User: [] 4 5 resources: 6 methods: 7 Controllers: 'method(SynSystems\Contracts\Controller\.*Controller->(?!initialize).*Action())' 8 9 acls: 10 Administrator: 11 methods: 12 Controllers: GRANT</pre>			
<p>The "Controllers" ACL is silently ignored; as soon as I change it to "ContractControllers" (or some other name), it is suddenly used. There is no trace in the logs that parts of the Policy.yaml file are ignored.</p> <p>I think silently ignoring parts of the Policy.yaml file is an absolute no-go; at least Flow should throw a warning if there is a naming clash with some internally used names.</p>
