TYPO3.Flow - Bug # 49423

Status:	New	**Priority:**	Must have
Author:	Rafael Kähm	**Category:**	
Created:	2013-06-25	**Assigned To:**	
Updated:	2013-09-05	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version:	Git master		
Subject:	Role name and packageKey are not accessible		
Description			

Properties name and packageKey for Role are not accessible, because setNameAndPackageKey() is not called.

Calling setNameAndPackageKey() in __construct() solves this.

History

#1 - 2013-06-29 22:26 - Alexander Berl

setNameAndPackageKey() is called within initializeObject, so it should be called with __construct() automatically via the proxy class. How did you instanciate the Role object? Could this possibly be related to #47975?

#2 - 2013-07-05 22:29 - Rafael Kähm

Alexander Berl,

yes it is but _construct() is not called by roles from repository.
_construct() is called only by "Anonymous" and "Everybody".

Q: How did you instanciate the Role object?
A: Roles are loaded from Repository over Account. ($account->getRoles())

#3 - 2013-09-05 10:26 - Jacob Rasmussen

I've noticed the same - and it doesn't matter if the roles are loaded directly from the repository using $repository->findAll() or as Rafael did - $account->getRoles()
