

LTS Smooth Migration - Task # 49455

Status:	Resolved	Priority:	Must have
Author:	Nico de Haen	Category:	
Created:	2013-06-26	Assigned To:	
Updated:	2013-07-09	Due date:	
Subject:	FAL Migration has to convert file links in tt_content		
Description			
<p>The migration tool does not convert file links in tt_content.bodytext to FAL compatible links (and it seems it never did).</p> <p>This is a show stopper for migration, since the links will be broken if changes are made to the file system after the migration.</p> <p>There is a routine to convert the links when opening the content element in RTE, but this is obviously not a solution since it would mean you have to open all content elements manually to have FAL compatible file links.</p> <p>Details described in #49233</p>
