Sprint Focus:					
Subject:	SystemEnvironmentCheck fails with undefined function imageftbbox				
Description					
<p>Running the environment check without having the function imageftbbox enabled an Exception occurs that is even suppressed by using @imageftbbox. Therefore the whole page is just white.</p> <p>Removing the @, the following Exception is shown:</p> <pre>Fatal error: Call to undefined function TYPO3\CMS\Install\SystemEnvironment\imageftbbox() in /vagrant/src/typo3_src/typo3/sysex/install/Classes/SystemEnvironment/Check.php on line 1073</pre> <p>A solution would be to check if the method is available via function_exists.</p> <p>I could also provide a patch but I am unsure about the message that should be displayed to the user.</p>

[BUGFIX] Check for imageftbbox() existence before usage

Install tool system environment check calls imageftbbox() without checking if the function exists and may fatal. The patch adds a function_exists() and introduces an error status message.

Resolves: #49458

Releases: 6.2
