Subject:	css_styled_content borderThick could not be set to 0		
Description			

the max image width would be calculated wrong when setting the borderThick to a value of 0.

The property "borderThick" is only used if the property "border" evaluates to 1. To have no border you simply set "border" to zero.

Does this solve the issue?

#3 - 2013-07-01 11:41 - Bernd Niehues

Setting the border property to zero (border = 0) doesn't work. But unsetting in completly (border >) does work.

tt_content.image.20 {
    borderThick = 0
    border >
}

Thx!

- Is Regression set to No

So we can close this issue?

#5 - 2013-11-01 13:24 - Bernd Niehues

May ne closed... But i think it would ne nicer to be able to unset the border also by setting it to zero?!
