

TYPO3.Flow - Bug # 49566

Status:	New	Priority:	Should have
Author:	Adrian Föder	Category:	Property
Created:	2013-07-02	Assigned To:	Adrian Föder
Updated:	2013-07-02	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	NULL source values are not handled correctly		
Description			
<p>currently, for example</p> <pre>\$this->propertyMapper->convert(NULL, 'array')</pre> <p>results into a message</p> <pre> No converter found which can be used to convert from "string" to "array"</pre> <p>which is at least incorrect for the source type, IMO the converter should return NULL then, too (i.e. leave the property untouched).</p> <p>I found this change here being relevant for this, https://review.typo3.org/#/c/1895/3/Classes/Property/PropertyMapper.php There, the \$source is hard-coded set to an empty string if it's NULL; I can't see a proper reason for that, since when deleting these lines all Tests still pass. Additionally, the tests for \TYPO3\Flow\Tests\Unit\Property\PropertyMapperTest::sourceWhichIsNoSimpleTypeThrowsException https://git.typo3.org/Packages/TYPO3.Flow.git/blob/master:/Tests/Unit/Property/PropertyMapperTest.php#l75 won't make any sense then.</p>
