

## Base Distribution - Task # 49595

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Rens Admiraal	<b>Category:</b>	
<b>Created:</b>	2013-07-02	<b>Assigned To:</b>	
<b>Updated:</b>	2013-07-02	<b>Due date:</b>	
<b>Subject:</b>	Neos setup does not check for required php-gd module		
<b>Description</b>			
<p>If you install Neos on a clean ubuntu machine and just install the minimum required packages / modules for Neos step 1 validates correctly. Finishing the setup will fail though, as the Imagine package (I think) has a dependency on php-gd so the last steps of the setup end up in a fatal error.</p>
