Subject:	Mask: sys_file / sys_file_reference override strategy

Description

Discussed at T3DD during UX FAL workshop there is a need to improve the form for overriding sys_file metadata from within sys_file_reference.

Problems in all day work:

Currently the checkbox to override sys_file values with sys_file_reference values is checked by default. The checkbox should be **unchecked** by default.

There is no label included to describe the action performed by the checkbox. A label should be added.

Checkbox functionality: Selecting the checkbox should perform the action **override** and not inherit.

Background: Adding files into content element can inherit sys_file metadata by default and should inherit by default.
When working with sys_file_references editors want to be able to accomplish the actions:

  - Inherit data from sys_file
  - Overwrite data from sys_file with content of sys_file_reference
  - overwrite data from sys_file with empty string

Editor's decissions in chronological order:

  1. Do I want to override sys_file default values? Yes/No
  2. What are the new values to override sys_file with? text Input (even empty)

Case inherit: When override is unchecked (inherit) no input field should be visible but the inherited text should be displayed.
Case override: When override is checked the input field must be displayed.

- Status changed from Resolved to Needs Feedback

After "re-seeing" this, I would like to see the overwritten content, instead of just the "checkbox".

I mean "What is the title?" that will be replaced?

    [x] Override "This is the parent title"?

Would that be possible?

Greez Jens

#17 - 2013-08-28 17:40 - Andreas Wolf

Documentation for the new mode "useOrOverridePlaceholder" is still missing.

#18 - 2013-08-30 11:44 - Ernesto Baschny

And please do not use UX-issue numbers to resolve Core issues! Open up a Core issue for working on the solution in the Core after it was approved in the UX tracker.

#19 - 2013-08-30 12:46 - Jens Hoffmann

@Ernesto: Can I close this issue here, than?
