[TASK] Use alternative selector for many workspaces

The toolbar of the workspace module visualizes each workspace in a separate tab. On having many workspaces, the toolbar is extended to multiple lines which actually reduces the available viewport of the grid panel.

This change introduces a modified TabPanel that shrinks if the available width is undershot. In this case an additional menu is rendered to the right side of the panel to visualize the remaining items in a vertical list.

Resolves: #49689

Releases: 6.2
