| Subject: | Remove createDirectoryRecursively() and replace by recursive mkdir() call | | |
| Description | <p>createDirectoryRecursively() in F3_FLOW3_Utility_Files can be removed, as PHP since 5.0.0 supports creating directories recursively with mkdir() through a simple method argument:</p> <pre>mkdir (string \$pathname [, int \$mode [, bool \$recursive]])</pre> | | |

Revision 524c55fd - 2008-05-09 18:08 - Karsten Dambekalns

Simplified createDirectoryRecursively() in F3_FLOW3_Utility_Files, fixes #497.

History

#1 - 2008-05-09 18:01 - Karsten Dambekalns

Removing this is not a good idea, as we currently have control over the umask/mode when creating the directories, we need to keep this. Thus it seems better to keep the method but simplify it's internals to just use native PHP support for recursion.

#2 - 2008-05-09 18:08 - Karsten Dambekalns

- Status changed from *Accepted* to *Resolved*

- % Done changed from 0 to 100

Applied in changeset r822.
