| **PHP Version:** | |
| **Has patch:** | No |
| **Complexity:** | |
| **Affected Flow version:** | Git master |
| **Subject:** | TYPO3.session.inactivityTimeout not working |

## Description

I'm logged in into the neos backend. After some idle time of doing nothing (don't know how much but like half an hour or so?), and realoading the page, i get redirected to the login page again.

I set the following in Configuration/Settings.yaml:

    TYPO3:
      session:
        inactivityTimeout: 0

what i expect is that i can be logged in "forever". My session cookie has a lifetime of 1 year so that should not be the problem :D

Please post the corresponding message from your Flow System log, something like:

Session: Destroyed session with id OTNfzTHXILKkO05KIHYpvLRuPivlsOir: Session OTNfzTHXILKkO05KIHYpvLRuPivlsOir was inactive for 57149 seconds, more than the configured timeout of 3600 seconds.

**#2 - 2013-10-28 00:20 - Simon Schaufelberger**

here is my message:

    Session: Destroyed session with id zog34Lk4Zr8UJiE19WAIlr0OqBphMioZ: Session zog34Lk4Zr8UJiE19WAIlr0OqBphMioZ was inactive for
    22314 seconds, more than the configured timeout of 3600 seconds.

what a shame, i think it was my fault. The indention was not correct in my settings.yaml. i will test it again and let you know my result.

**#3 - 2013-10-28 18:33 - Simon Schaufelberger**

ok, it really works. you can close that issue.
