

TYPO3.Neos - Bug # 49936

Work Package # 47023 (Accepted): Global user interface

Feature # 48233 (Resolved): Top bar

Feature # 48235 (Closed): Publish menu

Subject:	Auto-publish functionality behaves inconsistently		
Description	When toggling the auto-publish checkbox the button state becomes inactive if active or active if inactive. Seems like it doesn't really take into account if there already are unpublished changes or not. When switching auto-publish on we should publish all changes and deactivate the button.
