

## TYPO3.Neos - Task # 49937

Work Package # 45020 (Closed): Content Editing Stability and Features

Story # 45973 (Closed): As a content editor I want improved image handling

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Aske Ertmann	<b>Category:</b>	
<b>Created:</b>	2013-07-11	<b>Assigned To:</b>	
<b>Updated:</b>	2014-11-02	<b>Due date:</b>	
<b>Subject:</b>	Make multiple image selection possible		
<b>Description</b>	<p>All image properties should allow selecting multiple images</p> <p>The editor should behave the same for one image as for multiple images</p> <p>Additional options like crop, width, height, caption enabling, alt text, title text and linking should be done per image in the secondary inspector</p>		

### History

#### #1 - 2013-07-11 22:45 - Aske Ertmann

- Project changed from Base Distribution to TYPO3.Neos

#### #2 - 2014-02-14 13:52 - Roman Abt

i agree - the images content element was a real strength of typo3 CMS. neos should offer something with a similar functionality.

therefore i disagree that width and height should be editable for each image individually - the use case we encounter the most is that the editor needs to create a grid of images with either:

- all equal height
- all equal width
- all same max width / max height

#### #3 - 2014-10-02 13:29 - Philipp Hanebrink

- Status changed from New to Closed

Moved to Jira: <https://jira.typo3.org/browse/NEOS-517>
