Subject:	Node tree filtering		
Description			
<p>Add the possibility to filter the node tree with a query textfield matching the node titles and a selector for filtering node available node types.</p> <p>Since the tree structure needs to be there always, we will still show other nodes if they're parents of a filtered result. When querying the text matching should be highlighted and when filtering by node type the whole non-matched parent node should be dimmed/grayed out.</p>
