Updated:	2013-07-11	**Due date:**	
Subject:	Selecting a parent element doesn't change the content breadcrumb		
Description			

When another element is selected via the menu the menu should not be updated, making it possible to select the previous element again. However when a new element is selected normally it should. It should be enough to check if the selected element is one of the values in the currently shown menu and if it is, don't update it, if not update it.
