

## TYPO3.Flow - Bug # 5

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Karsten Dambekalns	<b>Category:</b>	
<b>Created:</b>	2006-12-14	<b>Assigned To:</b>	Robert Lemke
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Affected Flow version:</b>			
<b>Subject:</b>	Remove use of DIRECTORY_SEPARATOR		
<b>Description</b>			
<p>Currently a lot of places use the PHP constant DIRECTORY_SEPARATOR. This constant belongs to the directory functions (see <a href="http://de.php.net/manual/en/ref.dir.php">http://de.php.net/manual/en/ref.dir.php</a>), i.e. it is not even defined for the usual filesystem functions like fopen nor is it required for include/require. PHP translates a forward slash automagically on Windows.</p> <p>When specifying paths in php.ini it is even <b>required</b> to always use a forward slash, even when on Windows.</p> <p>What I want to say is: let's remove this ugly thing and just use / everywhere.</p> <p>For the sake of completeness: when calling local commands with exec() and friends one has to use the "right" separator, this is when it might come in handy...</p>			

### Associated revisions

#### Revision 9e736bb1 - 2008-02-11 14:25 - Robert Lemke

- FLOW3: (index.php) Simplified the TYPO3\_ROOT\_PATH definition (which will have to rename soon). Relates to #5
