Updated:	2014-10-02	**Due date:**	
Subject:	Auto Save should be more present		

Description

If i start editing some content the old state "Saved" is still present.

Maybe you cold change it directly to "unsaved" after changing something?

Otherwise i could think, that my changes are saved already because old state "Saved" is shown

until the autosave is triggered.

I think it should also be more present in its visual appearance so that its possible to recognice

changes on save state from the corner of one's eye.

Kind regards

Carsten Bleicker
