

TYPO3.Neos - Task # 50277

Status:	Closed	Priority:	Should have
Author:	Carsten Bleicker	Category:	
Created:	2013-07-22	Assigned To:	
Updated:	2014-10-02	Due date:	
Subject:	CSS Side Effects		
Description			
<p>Client sends me a Template wich has css styles like</p> <pre>a{ text-shadow: -1px -1px 0px #101010, 1px 1px 0px #505050; }</pre> <p>Styles like this having side effects f.e. on the pagetree. Maybe its a good advice for the template builder to introduce a rule like: Always build a wrapper div after the body <div class="myProject"> and prefix all your css with .myProject ...{} wich should be not a big problem if youre using sass or less.</p> <p>Or the css of neos has to reset all possible stype informations. but i think you'll never get all of them, right?</p> <p>Kind regards Carsten Bleicker</p>

Hi,

is it not possible to reset every style in .neos before setting the neos styles?

gr. Frans

#2 - 2013-11-16 19:54 - Benjamin Albrecht

Hi,

I have the same problem with my custom style for links:

My links have a background color and now all links in the Neos "backend" have the same background color...

The UX of the Neos Backend isn't really cool with this side effect ;-)

#3 - 2014-10-02 13:11 - Philipp Hanebrink

- Status changed from New to Closed

Moved to Jira: <https://jira.typo3.org/browse/NEOS-515>
