Is Regression:	Yes		
Sprint Focus:			
Subject:	Fatal error: Call to undefined method TYPO3\CMS\Core\Resource\ProcessedFile::getUpdatedProperties()		
Description	<p>After installation of TYPO3 6.1.2 I get the following error, if I select my folders in fileadmin to display the images. But I don't get the error for every folder. I updated the TYPO3 from version 6.1.1 to 6.1.2 and I think only folders with metadata in files like images have the problem. Directories with only html files for example are fine.</p> <p>*Fatal error:* Call to undefined method TYPO3\CMS\Core\Resource\ProcessedFile::getUpdatedProperties() in C:\Daten\arbeit\www\typo3_6\typo3\sysext\core\Classes\Resource\FileRepository.php on line 257</p> <p>*Call Stack:*</p> <pre>0.0000 348032 1. {main}() C:\Daten\arbeit\www\typo3_6\typo3\mod.php:0 0.3620 20975368 2. require('C:\Daten\arbeit\www\typo3_6\typo3\sysext\filelist\mod1\index.php') C:\Daten\arbeit\www\typo3_6\typo3\mod.php:41 0.3680 21377016 3. I think it is related to #48336 but I don't understand why the delete is called when you try to view a folder?

It is related to #48336 and a processed file needs to be (re-) created thus delete is called.

Please do not revert but fix :)

I will have a look at it after lunch

Hi Ernesto,

yes I have got something. Please have a look at it and let me know if this can be a solution or if we should take an other approach.

gr. Frans

- Status changed from Under Review to Rejected
- Target version deleted (next-patchlevel)

The initial change that introduced the regression has been reverted for all branches. The reason for this is, that the concept of using the deleted flag was not supported at all in the file abstraction layer. The topic will be discussed and continued during the FAL code sprint in the first week of August 2013 in Mainz/DE.
