Subject:	TypoScript string keys		

Description	

Currently trying to create keys with hyphens results in syntax error, however we need this functionality in order to have keys like data-nodename e.g.

The syntax could the equal to Yaml where you have 'Key-name': 'value', so 'Key-name' = 'value'

[TASK] Allow Hyphen in TypoScript paths

Allows using the hypen "-" character inside TypoScript paths
so you are able to do something like this:

page.header.attributes.data-foo = 'bar'
