[FEATURE] Add a clear all cache button to install tool

This implements a clear all cache functionality to the install tool.

The implementation is different from the existing backend solution so that it at least partly clears caches even if some broken extension is loaded that would kill the operation.

To achieve that, first a low level removal of typo3temp/Cache is performed, then all table names starting with "cf_" are truncated with direct database calls. After that ext_localconf and ext_tables of extension are loaded (this may fatal) and the final cache configuration is then feeded to the cache manager that executes the usual flushCaches() call.
