

TYPO3.Neos - Bug # 50567

Status:	Resolved	Priority:	Must have
Author:	Adrian Föder	Category:	JavaScript
Created:	2013-07-30	Assigned To:	
Updated:	2014-05-07	Due date:	
Subject:	URI to imageWithMetadata action is hard coded		
Description	<p>currently, the imageWithMetadata action used in the Image inspector, is hard coded in</p> <pre>Packages/Application/TYPO3.Neos/Resources/Public/JavaScript/Content/Inspector/Editors/ImageEditor.js:500 1 that.set('_loadPreviewImageHandler', \$.get('/neos/content/imageWithMetadata/' + imageVariant.originalImage, function (result) { 2...</pre> <p>this should be changed obviously; a suggestion was</p> <pre> to create a URL in the JavaScriptConfigurationViewHelper to the content controller and set window.T3Configuration.ContentUri or similar and use that instead in the ImageEditor</pre> <p>but maybe an overall concept should be thought about which serves URIs generally.</p>		

History

#1 - 2013-08-26 14:07 - Adrian Föder

update: neos/content/uploadImage is also such a hardcoded URI.

#2 - 2014-05-07 09:29 - Adrian Föder

- Status changed from New to Accepted
- Assigned To set to Adrian Föder
- Target version set to 1.1

#3 - 2014-05-07 10:23 - Aske Ertmann

- Status changed from Accepted to Resolved
- Assigned To deleted (Adrian Föder)
- % Done changed from 0 to 100

Has been fixed with <https://review.typo3.org/#/c/25204/>
