Updated:	2013-08-01	**Due date:**	
Subject:	Redirect Error after a fresh install		

Description

Hi,

i am not sure if there is still a existing ticket for that. I did not find a bug in the issue tracker.

I create a fresh neos and did not import the demo page in the install tool. I create a own package. The package creation works great, but if i log in to the backend i get an error because neos want to go to the home site. The default page is homepage and not home. So the redirect ends in a page not found exception.

http://neos.dev/home@user-admin.html does not work by default and should be
http://neos.dev/homepage@user-admin.html or http://neos.dev/@user-admin.html

If you need more information please give me a note.
