<b>Subject:</b>	Handling of branch option in GitCheckout Task does not work as expected.		
<b>Description</b>			
<p>Since the last updates the previously used option "git-checkout-branch" is replaced by "typo3.surf:gitcheckout[branch]" and the option is remapped internally to the new key.</p> <p>The code in the AbstractCheckoutTask-&gt;resolveSha1 is using the key "branch" in the option array that is handed over by the taskManager.</p> <p>The deployment is running but since the option is not read as expected the deployment will always fallback to the master branch unless the global "branch" option is set. Since this is not what surf itself says can cause serious trouble.</p>

[BUGFIX] Fixed a misleading deprecation message and wrong option mapping

The options used in setDeprecatedTaskOptions were misspelled in lowercase where lowerCamelCase is needed. This patch fixes the deprecation warning and the option mapping for the old options.

To me it looks like an incomplete merge. Is it possible that a change in the option handling was not included in the commit or is still in the review-process?

I found the reason for the problem.

Option "git-checkout-branch" is deprecated and will be removed before Surf 1.0.0. Set option "typo3.surf:gitcheckout[branch]" instead.

The deprecation message is misleading since the mentioned option "typo3.surf:gitcheckout[branch]" must be written in CamelCase as "typo3.surf:gitCheckout[branch]" to have an effect.

So i think this is mostly a documentation bug.
