<b>Complexity:</b>	easy		
<b>Sprint Focus:</b>			
<b>Subject:</b>	Installer: Show only empty databases? Offer to overwrite TYPO3-related tables?		
<b>Description</b>	<p>Since commit 2e3c9d5e25e5beadafebca949de3e05eeb6f120a in 6.2 the installer now only shows empty databases (zero tables) in the dropdown to choose an existing database from (DatabaseSelect.php). But the help-text still points out that it will overwrite all typo3-related tables in that database.</p> <p>We should either imho show all databases again or remove that comment.</p> <p>If we choose to display only empty databases imho we should still highlight that other databases exist but are not usable (disabled entries in the dropdown? ...).</p> <p>Personally I'd like to see all databases again, maybe with a hint/warning that it already contains data.</p>

### History

#### #1 - 2013-09-14 21:55 - Christian Kuhn

This was adapted already: On installation only empty db's are shown, if upgrading and this step need execution for whatever reason, all databases are shown. I think this is good, casual users should **not** see non empty databases during installation to not harm existing data. The shown text however is a bit misleading and should be updated.

#### #2 - 2013-09-14 21:55 - Christian Kuhn

- Parent task set to #49162

#### #3 - 2013-09-29 19:53 - Christian Kuhn

- Status changed from New to Resolved

This was solved with #52314

#### #4 - 2013-09-29 19:53 - Christian Kuhn

- Target version set to 6.2.0

- % Done changed from 0 to 100

- PHP Version set to 5.4

- Complexity set to easy
