TYPO3.Fluid - Bug # 5108

Status:	Resolved	**Priority:**	Must have
Author:	Fernando Arconada	**Category:**	
Created:	2009-10-25	**Assigned To:**	Sebastian Kurfuerst
Updated:	2010-10-20	**Due date:**	
Has patch:			
Affected Flow version:			
Subject:	Custom ViewHelper couldnt find validator of its own domain		

Description

I've a model Tx_Mytube_Domain_Model_Video

I have created a ViewHelper
class Tx_Mytube_ViewHelpers_VideoViewHelper extends
Tx_Fluid_Core_ViewHelper_AbstractViewHelper {
/**
  - Renders the video player*
  - @param Tx_Mytube_Domain_Model_Video $video
  - @return string the content of the rendered TypoScript object
      */
        public function render(Tx_Mytube_Domain_Model_Video $video) {
            return "AAAAAA";
        }

}
?>

and a template

{namespace mytube=Tx_Mytube_ViewHelpers}
<mytube:video video="{video}"/>

But i having an exception

#1237900534: No validator found for argument name "video" with type
"Tx_Mytube_Domain_Model_Video" in view helper
"Tx_Mytube_ViewHelpers_VideoViewHelper".

Revision 64b1682d - 2009-10-26 07:06 - Sebastian Kurfuerst

[+BUGFIX] Fluid (Core): Validation of ViewHelper arguments is non-mandatory now, as there is no validator for each domain object / we do not always want to call it. Resolves #5108.

[+BUGFIX] Fluid (Core): Shorthand Syntax of ViewHelpers can now use longer namespace prefixes than one character. Resolves #5107.
