TYPO3.Fluid - Feature # 51100

Status:	New	**Priority:**	Must have
Author:	Patrick Kroog	**Category:**	ViewHelpers
Created:	2013-08-16	**Assigned To:**	
Updated:	2013-08-16	**Due date:**	
Has patch:	No		
Subject:	Links with absolute URI should have the option of URI Scheme		

Description

At the moment it's not possible to build absolute URIs with https scheme.

Only the ExternalViewHelper allows configuring the URI scheme.

Describing example of the problem:

<f:uri.action pageUid="1" arguments="{client:client}" absolute="1" />

builds a full link like:
- http://example.com/index.php?id=1&tx_myplugin[client]=10

But there's no option to set the URI scheme to https, alghough the

uriBuilder would allow setting the URI scheme:
$uriBuilder->setAbsoluteUriScheme("https");

(Referring to: fluid/Classes/ViewHelpers/Uri/ActionViewHelper.php)

--

So there should be another option for this in the render method in the Action/Page Viewhelpers!

History

#1 - 2013-08-16 12:04 - Patrick Kroog

- File ActionViewHelper.patch added

- File PageViewHelper.patch added

These are patches for TYPO3 v4.7.14 on the Uri ViewHelpers
- PageViewHelper
- ActionViewHelper

Both must be used, otherwise the uribuilder doesn't UNSET the uri scheme value before the next link is generated..

#2 - 2013-08-16 12:06 - Patrick Kroog

- File ActionViewHelper.patch added

- File PageViewHelper.patch added

These are the patches for the Link ViewHelpers (TYPO3 v. 4.7.14)
