TYPO3.Fluid - Bug # 51239

Status:	Under Review	**Priority:**	Must have
Author:	Timo Dödtmann	**Category:**	Core
Created:	2013-08-21	**Assigned To:**	Adrian Föder
Updated:	2014-04-11	**Due date:**	

Has patch:	Yes
Affected Flow version:	Flow 2.0.0
Subject:	AbstractViewHelper use incorrect method signature for "$this->systemLogger->log()"

Description

Within the `AbstractViewHelper::callRenderMethod()` a log entry will be created if en exception is thrown.
But the method signature of the systemLogger (\TYPO3\Flow\Log\LoggerInterface) looks slightly different to the method call.

TYPO3\Flow\Log\LoggerInterface

    public function log($message, $severity = LOG_INFO, $additionalData = NULL, $packageKey = NULL, $className = NULL,
    $methodName = NULL);

vs.

TYPO3\Fluid\Core\ViewHelper\AbstractViewHelper

    $this->systemLogger->log('An Exception was captured: '. $exception->getMessage() . '(' . $exception->getCode() . ')',
    LOG_ERR, 'TYPO3.Fluid', get_class($this));

The `$additionalData` is missing.

History

#1 - 2014-02-24 13:40 - Adrian Föder

- Status changed from New to Accepted

- Assigned To set to Adrian Föder

- Priority changed from Should have to Must have

#2 - 2014-04-11 09:04 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.Fluid** has been pushed to the review server.
It is available at https://review.typo3.org/29377

#3 - 2014-04-11 10:41 - Gerrit Code Review

Patch set 2 for branch **master** of project **Packages/TYPO3.Fluid** has been pushed to the review server.
It is available at https://review.typo3.org/29377

Patch set 3 for branch **master** of project **Packages/TYPO3.Fluid** has been pushed to the review server.
