Sprint Focus:			
Subject:	Reportsmodule add test for Bug in LibXML		

Description

Some scary host have problems saving ">><<" in a flexform.

To fix this we have an option in the installtool.

    Installtool:
    [BE][flexformForceCDATA] = 0

To avoid frustration this should be checked either in the installtool or in the reports module.

a text could possibly use these two functions:

array2xml

https://typo3.org/api/typo3cms/class_t_y_p_o3_1_1_c_m_s_1_1_core_1_1_utility_1_1_general_utility.html#ab8631dc310e0931c0abe834f93bfbc42

xml2array()

using them with

    array -> array2xml -> xml2array -> check if both arrays are the same

Should show wether the problem is present or not :D

Good idea, having this additional check could indeed be helpful! Could you provide a patch for it before beta2?
