

TYPO3.Flow - Bug # 51312

Status:	New	Priority:	Should have
Author:	Claudio Kressibucher	Category:	Core
Created:	2013-08-24	Assigned To:	
Updated:	2013-08-24	Due date:	
PHP Version:	5.4		
Has patch:	No		
Complexity:	medium		
Affected Flow version:	Flow 2.0.0		
Subject:	Default php error handler generates warning (when loading TYPO3\Flow\Error\Exception class)		
Description	<p>Warning is generated when trying to load TYPO3\Flow\Error\Exception from Cache. Tested in Version 2.0.0 (Flow) PHP-Version 5.4.9</p> <p>Steps to reproduce:</p> <ul style="list-style-type: none">- configure server to show warnings- Install Quickstart via composer (as in the Quickstart tutorial)- The welcome page shows Warning on include_once(path/to/cached/TYPO3_Flow_Error_Exception.php) (only if this file does not exist in the Cache-Directory, which was the default setup as I followed the Quickstart tutorial) <p>Problem is in TYPO3\Flow\Error\ErrorHandler:</p> <ul style="list-style-type: none">- try to load class TYPO3_Flow_Object_ObjectManager from cache (via include_once in SimpleFileBackend::requireOnce)- The error handler (ErrorHandler::handleError) is executed. To prevent infinite recursive loops, php resets error handler to default while executing the custom error handler. (See http://php.net/manual/de/function.set-error-handler.php#48933)- In line 79 class_exists('TYPO3\Flow\Error\Exception') gets executed. This will also generate the error when failing to include the file TYPO3_Flow_Error_Exception.php from cache. But now php's default error handler is executed and therefor a warning is generated and send to the browser.- The Exception-Class is loaded from Package-File, so everything is working fine. The only problem is the warning that should not be generated.		

History

#1 - 2013-08-24 16:00 - Claudio Kressibucher

- File ErrorHandler.patch added

Added a patch file (disabling reporting of warnings when generating Exception object)

#2 - 2013-08-24 16:07 - Claudio Kressibucher

- File ErrorHandler.patch added

Please use my second patch file (submitted in this post). I forgot to delete some debugging code in the first try ;-)
