Sprint Focus:	
Subject:	Broken error handling for not existing folder

Description

If a folder is not accessible, the the whole file module is broken, not even the header row is displayed.

Also the module never tries to access any parent folder; the error message is wrong.

typo3/sysext/filelist/Classes/Controller/FileListController.php line 170.

I discovered this while reproducing #51190 which is a good way to trigger the error handling code.

Revision 6fe13fdb - 2014-01-31 14:57 - Ingo Schmitt

[BUGFIX] Do not show exeption when folder is not accesible

When a storage folder is not accessible for the user a exception
is displayed. Same if the folder is missing.

This patch changes the exception to
\TYPO3\CMS\Core\Resource\Exception.

The user will get a flash message and FAL tries to display the
parent folder of the restricted folder. If the folder is
missing the parent folder is displayed.

Resolves: #51762, #51319
Releases: 6.2
