Updated:	2013-08-26	Due date:	
TYPO3 Version:	6.2		
PHP Version:	5.3		
Complexity:	medium		
Is Regression:			
Sprint Focus:			
Subject:	Install tool database select during upgrading		
Description			
<p>Suppose you have a if or switch/case construct in localconf.php to handle different database settings for different hosts in the file.</p> <p>If upgrading this to 6.2, it may happen that the wrong database name is transferred to LocalConfiguration.php. In effect, the "DatabaseSelect" step will be rendered.</p> <p>If that happens, it would be useful if not only "empty" databases with no tables are displayed in the "select existing database" drop-down, but also existing tables with tables. Furthermore, the "create new database" input field should be removed if upgrading (not in first install).</p>
