Revision 915d9987 - 2013-09-12 13:55 - Christian Kuhn

[TASK] Install tool: Refactor db connect configuration settings

Refactor needsExecution() logic to make sure the mandatory settings (username, password, host, port) are present in LocalConfiguration.php before trying to establish a database connection using these settings.

This fixes a possible redirect loop if some of the mandatory settings were not present, but the database connection check still succeeded.
