<b>Affected Flow version:</b>			
<b>Subject:</b>	Routing: RouterCacheAspect only converts objects in the first dimension of route values		
<b>Description</b>			
in Classes/MVC/Web/Routing/Aspect/RouterCachingAspect.php we currently have			
<pre>foreach (\$routeValues as \$k =&gt; \$v) {     if (is_object(\$v)) {         \$routeValues[\$k] = spl_object_hash(\$v);     } }</pre>			
But \$routeValues could be multi-dimensional, so we'll have to convert objects recursively.
