Sprint:			
PHP Version:			
Has patch:	Yes		
Complexity:			
Subject:	cache:warmup should cache every possible configuration		
Description			
currently, flow:cache:warmup only caches configuration on a random base; however, every possible configuration source should be touched and cached in order to prepare the Production environment, for example.

Revision 88dd9edb - 2013-09-10 15:13 - Adrian Föder

[FEATURE] Let cache:warmup warm up every configured configuration type

When having done a flow:cache:warmup, the Configuration Manager only cached the configurations which were necessary during the CLI command invocation, so, for example, Routes, Views, NodeTypes etc. were not cached.

This change introduces a SignalSlot listening to the warmupCache signal, and touching every configured configuration type in order to make it present in the configurations array, ready for later storing.

Change-Id: I82f508b977cc4146fa5fd46ab82581a5f4156ea5

Resolves: #51652

Releases: master
