Revision 4bf5e79f - 2013-09-06 19:43 - Helmut Hummel

[BUGFIX] Enable ProcessedFiles to do file exists

Make storage 0 folder readable, browsable and writable
to mitigate the problems that arise with non
readable processing directories.

Also allow file exists in general if the
identifier in subject is in processing folder.

Resolves: #51808

Releases: 6.0, 6.1, 6.2

I've applied the patch but the problems I reported earlier (=> <http://forge.typo3.org/issues/51747#note-41>) remain.

Does this patch and patch 6 (ticket #51747) work together or do I have to reset all files prior to applying this patch?

#4 - 2013-09-06 13:52 - Philipp Gampe

@Dominik please report your test results directly in gerrit. You may set the verified state to -1.

Hint: Gerrit uses the same login data as for typo3.org or forge.

OK, for anybody having problems with the current release, please try out this

<https://review.typo3.org/23660> (patch set 5)

It rolls back permission restrictions for storage 0 and should solve all problems with RTE and old extensions (like tt_news)

#11 - 2013-09-06 16:22 - Andrea Böhm

With this patch set editors can insert images via RTE again.

Thanks Helmut!

- *File Uncaught_1376992145.txt added*

while these patches resolve the RTE images issues they introduce a minor issue in the filelist module.

It is not a mayor bug but I want to mention it:

The filelist module now shows the *processed* folder. Clicking on this folder leads to an exception #1376992145 (see attached file).

Update: see next post

#18 - 2013-09-06 20:40 - Andrea Böhm

- *File Uncaught_1314354065.txt added*

Sorry - I've attached the wrong file - exception #1314354065 is the correct one.
