Subject:	clean up Node Structure between TYPO3 Neos and TYPO3.Neos.NodeTypes			

Description

As discussed on 11.09. with the team, we found that some node types resided in TYPO3.Neos.NodeTypes, and others in TYPO3.Neos -- making it hard to understand for the implementor.

During the meeting, we came up with the following rules:

- TYPO3.Neos should work without TYPO3.Neos.NodeTypes
- all node types which TYPO3.Neos depend on (i.e. which are hardcoded in the source code somewhere) should be in TYPO3.Neos, all others in TYPO3.Neos.NodeTypes.
- All node types in TYPO3.Neos should be either **abstract** (meant to be extended) or **final** (not allowed to be extended). This means the average user does not have to deal with these node types.

As a result, this means the following node-type-changes:

- Page is migrated from TYPO3.Neos to TYPO3.Neos.NodeTypes
- Plugin is marked **abstract**, but stays in Neos
- Shortcut is moved to Neos.NodeTypes
- ContentCollection is marked final

Revision ab82a0b8 - 2013-12-09 20:47 - Sebastian Kurfuerst

[!!!][BUGFIX] Move Page from TYPO3.Neos to TYPO3.Neos.NodeTypes

To update, run:

 - ./flow core:migrate --package-key Your.SitePackage # updates your TypoScript and NodeTypes.yaml
 - ./flow node:migrate live 20130911165510 # updates your Node structure

Technically, this change only deprecates TYPO3.Neos:Page not actually

removing it yet -- so rendering will still work as before for sites

which did not do the upgrade from above.

The footer below makes sure that this code migration is not applied anymore to

this package.

Make sure to apply the corresponding change of the TYPO3.Neos package as well,

which is l35d0ee4eeff5096d9801445bf1c0dc69c6626d44.
