

TYPO3.Flow - Bug # 52068

Status: Closed	Priority: Should have
Author: Christian Eßl	Category: Property
Created: 2013-09-17	Assigned To:
Updated: 2013-09-26	Due date:
PHP Version:	
Has patch: Yes	
Complexity:	
Affected Flow version: Flow 2.0.0	
Subject: ArrayConverter should accept empty strings	
Description	
<p>Imagine a select-box like this:</p> <pre><label for="categories">Categories:</label> <select name="content[categories][]" multiple="TRUE" id="categories"> <option value="0">Category 1</option> <option value="1">Category 2</option> <option value="2">Category 3</option> </select></pre> <p>with this array-property:</p> <pre>/** * @var array */ protected \$categories;</pre> <p>The select box allows multiple selected categories and none is selected by default.</p> <p>If you submit the form without selecting any category, the PropertyMapper throws the exception:</p> <pre>No converter found which can be used to convert from "string" to "array".</pre> <p>The property mapper treats the empty values of the categories-select as string. Shouldn't in this case the ArrayConverter accept empty strings and convert them to an empty array()?</p>
