

## TYPO3.Surf - Bug # 52072

<b>Status:</b>	New	<b>Priority:</b>	Should have
<b>Author:</b>	Michael Knoll	<b>Category:</b>	
<b>Created:</b>	2013-09-17	<b>Assigned To:</b>	
<b>Updated:</b>	2013-09-17	<b>Due date:</b>	
<b>Subject:</b>	Make Port in Varnish Tasks configurable		
<b>Description</b>			
<p>The Varnish ban and purge tasks have the port for Varnish management hardcoded. Since there might be different ports than 6082 for that, this should be configurable see patch below.</p>			
<pre>\$secretFile = (isset(\$options['secretFile']) ? \$options['secretFile'] : ""); \$purgeUrl = (isset(\$options['purgeUrl']) ? \$options['purgeUrl'] : "ban.url."); \$varnishadm = (isset(\$options['varnishadm']) ? \$options['varnishadm'] : '/usr/bin/varnishadm'); \$varnishport = (isset(\$options['varnishport']) ? \$options['varnishport'] : '6082'); \$varnishport = '-T 127.0.0.1:' . \$varnishport; \$varnishsecret = (\$secretFile !== "" ? '-S ' . \$secretFile . ' :'); \$this-&gt;shell-&gt;executeOrSimulate(\$varnishadm . \$varnishsecret . \$varnishport . ' ' . \$purgeUrl, \$node, \$deployment);</pre>			
<p>Btw: is there any possibility to do a pull request for the surf project, that would make fixes easier...</p>
