[TASK] Remove GFX im_imvMaskState and im_negate_mask settings

There are two very weird settings is GFX array that previously

decided on how "masks" are applied to images if combining

multiple images. GFX/im_negate_mask and GFX/im_imvMaskState are

also manipulated during boostrap and depend on each other.

Fiddling with those settings in ImageMagick 6 and GraphicsMagick

with its supported versions, it turns out that they are obsolete

and can be removed completly. The patch does this.
