Subject:	Additional hook to manipulate configuration				
Description					
<p>Hi,</p> <p>i need a hook to change the realurl configuration when not using the auto configuration feature.</p> <p>I'm not sure if this is the best solution or the right spot to add such a hook, but i'm attaching a patch for discussion.</p> <p>Background:</p> <p>On a large, multidomain site we are using auto generated subdomains for backend previews.</p> <p>These subdomains are now generated in a small function inside the realurl_conf.php.</p> <p>As this does not seem to be the best possible solution i would like to move the function in a separate extension.</p> <p>Cheers</p> <p>Benjamin</p>

- Priority changed from Should have to Won't have this time

It is ok to use that function.

You can also update realurl configuration in your ext_localconf.php.
