Updated:	2013-12-14	Due date:	

Subject: Ember based Navigation component

Description

Ember based Navigation component

- Target Audience: all users of Neos
- Responsible: [Rens Admiraal](#)
- Implemented by: Rens Admiraal, Henjo Hoeksma
- Amount: 10 work days
- Version: **could have** for 1.0
- Planned Implementation Timeframe: September till October

Motivation

The current page tree in Neos does do it's job, but for having a solid API and to make sure maintenance will be doable we need an ember based component

Goal

The navigation component should be an extensible tree which could become Neos API and is usable for different types of nodes, like pages, news messages or any other kind of nodes. Depending on the node type it should be possible to do grouping in the tree (like 'group all news by year / month')

Deliverables

- Create a tree implementation for Neos based on Ember
- Inline editing in the tree
- Drag & Drop support
- Easy node type switching
- Grouping on 1 level based on node properties
- **could have** Grouping over multiple levels
- Keyboard support
- Documentation of the feature, and documentation for other developers using / extending Neos

History

#1 - 2013-10-04 15:57 - Rens Admiraal

- Subject changed from *Navigation component* to *Ember based Navigation component*

#2 - 2013-12-14 16:48 - Rens Admiraal

- Status changed from *New* to *Accepted*
