

Media Management - Bug # 52215

Status:	Closed	Priority:	Should have
Author:	Dominik Steinborn	Category:	
Created:	2013-09-24	Assigned To:	Fabien Udriot
Updated:	2013-10-30	Due date:	
Subject:	Delete and massDelete do not delete variant files		
Description			
TYPO3 is configured to automatically create a variant on upload. When deleting the original image the variant file will remain.			
<div>1. Upload an image file</div> <div>2. Image with corresponding variant is displayed in media backend</div> <div>3. Delete the image</div>			
=> the image file remains on the file system and the database entry of the variant is not marked as deleted			
Expected result:			
The image and all corresponding variants are deleted from file system and marked as deleted in the database.

History

#1 - 2013-09-24 15:09 - Dominik Steinborn

As far as I found it this is related to / blocked by the following bugs in FAL #51838 and #50876

#2 - 2013-10-30 13:34 - Fabien Udriot

- Assigned To set to Fabien Udriot
- Target version set to 2.0.0

Done when merging "develop" into "master". It is handled in a quite "manual" way for now.

#3 - 2013-10-30 13:34 - Fabien Udriot

~~I can not mark the issue as resolved :(~~ Marked the issue as closed directly in the DB.
