FYI, branch "develop" was merged into "master". Media is now inline with FAL when it comes about deleting a file. FAL does not have enables fields anymore (deleted, hidden, ...). The flag "hidden" was removed from the so called "enables fields" at the TCA level and was renamed to be "visible". A migration wizard still needs to be coded.

Hi Fabien,

thanks a lot - especially for your hint about the changes in FAL.

I guess I will meet this issue again with my own extension media\_frontend.

Cheers

Dirk
